

Flight Animator!

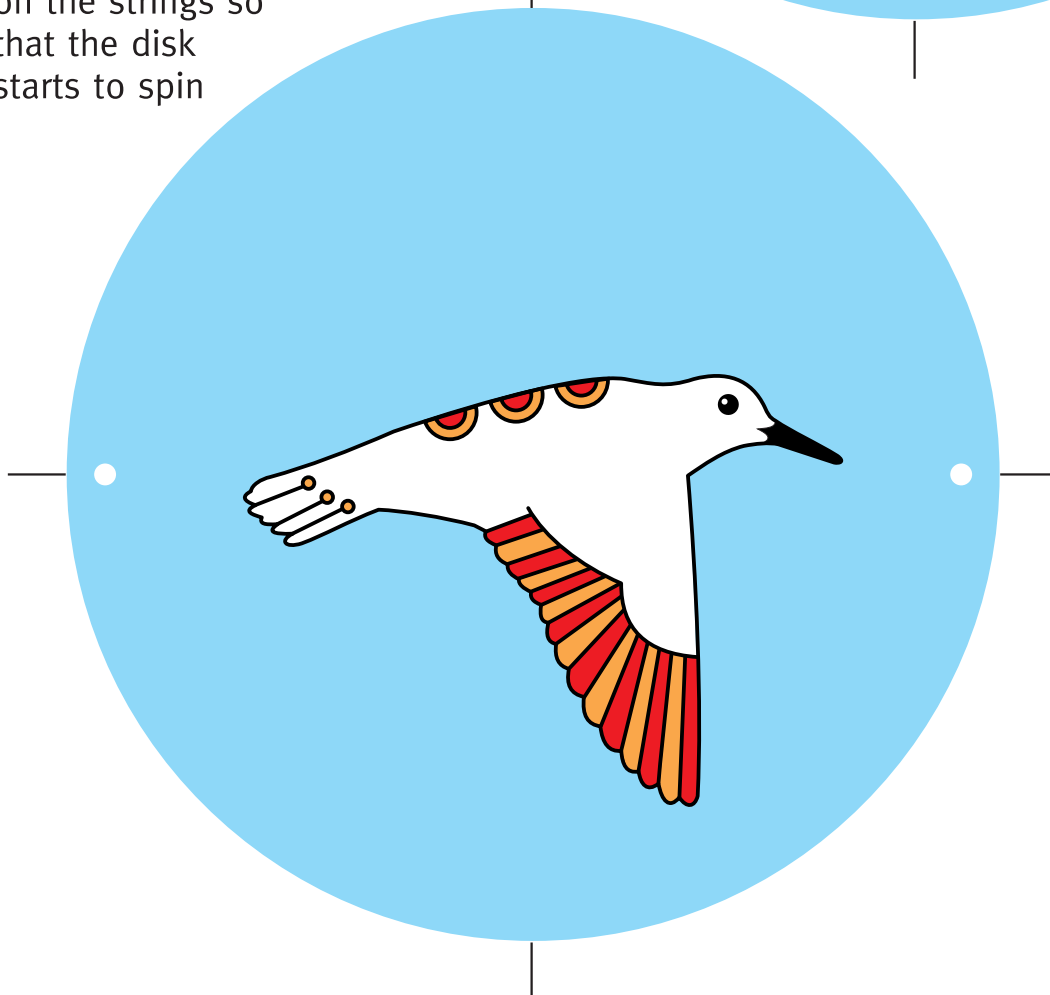

1. Roughly cut out the two circles, leaving the guidelines in place, and put them back-to-back. Make sure the bird is facing the same direction on both sides. One of the birds will need to be upside down for this to happen! Line the two circles up using the guidelines and glue them together back-to-back.
2. Cut your new disk down to its circular shape, getting rid of the guidelines.
3. Punch a hole in the white dots on each side, and tie a piece of string through each one.

It's ready! Pull and twist on the strings so that the disk starts to spin

- You will need:
- 1 par of scissors
 - string

Make sure the bird is facing the same direction on both sides

Line the two circles up using the guidelines and glue them together back-to-back.
